

Educating with Heart and Mind

PERSPECTIVES FOR
CURRICULUM IN
CHRISTIAN SCHOOLS

This resource is a collection of biblical perspective statements that have been developed by the SCSBC through the efforts of a number of people since 1980. All of the statements were produced as the collaborative work of many teachers and principals.

Educating with Heart and Mind publishes these foundational perspective statements in an up-to-date format and includes titles of additional resources

for many of the topics. These statements are a valuable resource for teachers, principals, and boards as they discuss the purpose and direction of various aspects of Christian education. They may also be used to help parents and school society members reflect on the unique foundations of Christian education.
